

Daeun Moon

mundaeun@snu.ac.kr | <https://moon-daeun.github.io> | www.linkedin.com/in/daeun-moon

RESEARCH INTERESTS

Topics

- AI infrastructure and technology policy
- Science, technology and innovation policy
- Socio-technical systems and transitions
- Innovation systems and knowledge production
- Economic complexity

Methodologies

- Patent and bibliometric analysis
- Complex network analysis
- Econometric analysis
- Natural language processing and text analysis
- Comparative case study and policy analysis

EDUCATION

2024 - Present	Ph.D. in Technology Management, Economics and Policy (expected February 2027) Seoul National University, South Korea · Integrated Major of Smart City Global Convergence
May 2026 - October 2026	Visiting Researcher Lund University, Sweden <i>Environmental and Energy Systems Studies & CIRCLE (Centre for Innovation Research)</i> Host: Prof. Lars J. Nilsson
2022 - 2024	M.S. in Technology Management, Economics and Policy Seoul National University, South Korea · Integrated Major of Smart City Global Convergence
2009 - 2015	B.Arch. in Architectural Design Hanyang University, South Korea

MANUSCRIPTS (*Corresponding Author)

Moon, D., Lim, S., Hwang, J., & Hwang, Y.* “National AI Capability as a Multi-Dimensional Portfolio: Evidence from Publications and Patents.” (*Revise and Resubmit; revised manuscript submitted, Technological Forecasting and Social Change*)

Moon, D., Hwang, J., & Lim, S.* "Analyzing AI Educational Technology Acceptance in Developing Countries: A Study of University Professors in Lombok." (*Under Review, International Journal of Educational Technology in Higher Education*)

POLICY & RESEARCH REPORTS

Moon, D. et al. (2025). *AI Innovation across Industries: Analysis of Industry-Level AI Patent and Publication Data* [Report in Korean]. Korea Development Institute (KDI).

CONFERENCE PRESENTATIONS

Moon, D., Cho, Y., & Kang, Y. (2026, September). Materializing sustainable AI: Are policy frameworks translated into public attention? *Earth System Governance Conference*, Bath, UK.

Moon, D., Choi, S., Lee, S., Ryu, C., & Kim, H. (2026, June). Governing high-performance computing as national knowledge infrastructure: A comparative analysis between Sweden and South Korea. *International Conference on Innovation and Technology Studies (ITS 2026)*, Tokyo, Japan.

Moon, D. (2025, June). Analyzing the impact of artificial intelligence development on green technology innovation: Temporal evolution and threshold effects. *International Association for Management of Technology PhD Colloquium*, Montreal, Canada.

Moon, D. (2025, June). Raw material first: Rethinking R&D portfolio strategy in green technology lifecycles. *International Association for Management of Technology*, Montreal, Canada.

Moon, D. (2025, May). Green technology policy and innovation across life cycle stages: A BERT-based patent analysis. *Atlanta Conference on Science and Innovation Policy*, Atlanta, USA.

Moon, D., Lim, S., & Hwang, J. (2024, December). Analyzing AI educational technology acceptance in developing countries: A study of university professors in Lombok. *Korean Society of Technology Management & Economics Winter Conference*, Korea.

Moon, D. (2024, November). Green technology patent trends and national growth potential: Global industrial innovation strategy analysis. *Korean Society of Innovation Fall Conference with KISTEP*, Korea.

Moon, D. (2024, August). Mapping the digital twin knowledge landscape: Identifying core technologies and regional diversification potential in the U.S. *US-Korea Conference on Science, Technology, and Entrepreneurship (UKC)*, San Francisco, USA.

Moon, D., Park, S., & Hwang, J. (2024, May). Literature review of smart city policy trends in South Korea and China: Focusing on climate responses. *International Conference on Management and Information Technology*.

SCHOLARSHIPS AND AWARDS

- | | |
|------|---|
| 2026 | STINT-SKERIC Long-term Mobility Grant (170,000 SEK)
Sweden Korea Education, Research and Innovation Collaboration (SKERIC) |
| 2024 | Grand Prize, 13th KNDA Academic Paper Award
Korea National Diplomatic Academy
<i>Clustering-Based National AI Science & Technology Innovation Strategy</i> |

RESEARCH EXPERIENCE

- | | |
|----------------|--|
| 2025 - Present | Selected Researcher
<i>SKERIC (Sweden Korea Education, Research and Innovation Collaboration)</i>
Dynamic, Secure and Sustainable Society team |
| 2024 | Research Assistant
<i>Korea Development Institute (KDI) & STEPI Joint Project</i>
Developed comparative framework for AI competitiveness assessment |
| 2023 | Research Assistant
<i>National Institute of Green Technology, South Korea</i>
Analyzed carbon neutrality R&D investment patterns |

2023 **Research Assistant**
Samsung Global Research, South Korea
Proprietary research under NDA

TEACHING EXPERIENCE

2025 **Teaching Assistant**
Fall *Introduction to Smart City Global Convergence* (graduate), Seoul National University
2025 **Teaching Assistant**
Fall *Smart City Seminar on Technology Convergence (Understanding Fundamentals of Smart Cities)*
(graduate), Seoul National University
2024 **Teaching Assistant**
Spring *Engineering, Technology and Society* (undergraduate), Seoul National University

WORK EXPERIENCE

2017 - **Engineering Project Manager / Research Engineer**
2022 *DMS Engineering & Solaria Engineering*
Managed solar PV projects across Korea, China, and United States
